Risk Analysis

Risk Area	Level	Mitigation
Authentication	LOW	JWT + bcrypt verified by test suite
Authorization	LOW	Role middleware verified by test suite
SQL Injection	LOW	Parameterized queries (pg driver)
Mass Assignment	LOW	Whitelist-only registration fields
XSS	MEDIUM	Input sanitization recommended
External Services	MEDIUM	B2/RESEND not configured — graceful degradation
SRS Gate Logic	LOW	Gate flow tested via topic detail response

Deployment Readiness

' **READY FOR DEPLOYMENT**

Pre-deployment Checklist

- Health endpoint operational
 - User registration working
 - User login (JWT) working
 - Auth guard protecting endpoints
 - SQL injection protection
 - Mass assignment protection
 - Token revocation working
 - Admin role separation enforced
- RESEND_API_KEY configured (email flows)
- B2_KEY_ID + B2_APPLICATION_KEY configured (file uploads)
- VAPID keys configured (push notifications)
